OVERVIEW

ANDHARBAN JUNGLE TREK

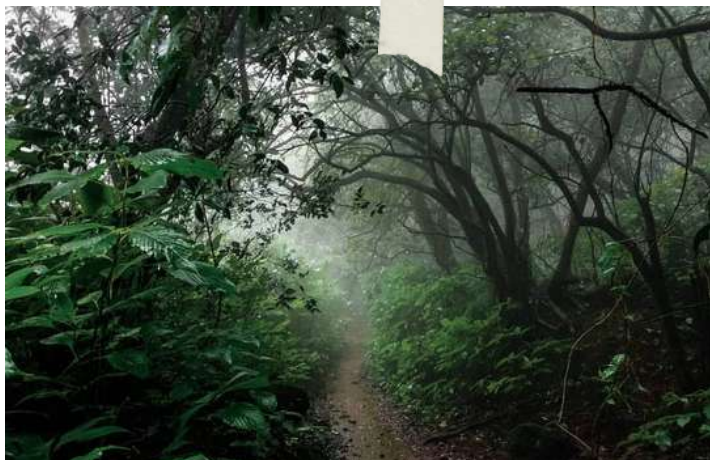

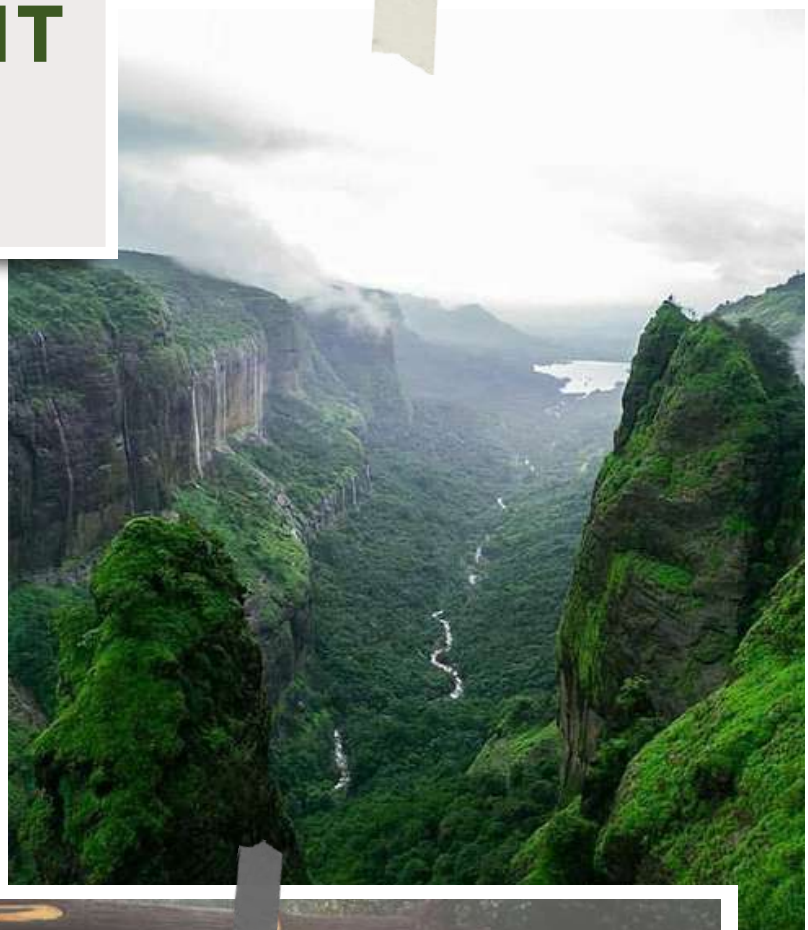

Andharban, simply means a 'Dark Dense Forest'. During monsoons, this trek is one of the most refreshing treks of the Sahyadri. It is the most beautiful attraction of the Sahyadri range which connects the Tamhini Ghat to the famous Konkan region. Located in the Pimpri region of Maharashtra, approximately 16 km from the Pune, Andharban trek is the perfect place for every trekker who wishes to experience the pleasure of wandering deep jungles with enthralling views.

One can truly call it the heaven of the Sahyadri. It is a beautiful experience to embark upon an exhilarating Monsoon Trek to the Andharban forest and is a must-visit destination for all nature lovers. Trekking here during monsoons is all about hiking across delightful green hills, soaking in gorgeous waterfalls, and witnessing the massive fur of clouds right beside you!

It is quite bright when you start trekking. But as you descend further, soon you will find yourself walking in the shade of evergreen trees covering the trails and it starts getting dimmer. You will be walking in this dense dark forest for the first 7-8 km. This trail continues straight where you will be walking on the edges just beside Kundalika valley and with the mountain ranges to your right.

This trek is truly an experience of a lifetime!
