The Highest Peak of the Maharashtra,
KALSUBAI
Sunrise Trek

EX - PUNE

OVERVIEW

Kalsubai is a 6.6 km-long (4.1 mi) trek with an elevation gain of around 2,700 feet (820 m). This is a one-day trek having a moderately hard difficulty level, with lush green landscapes and multiple waterfalls. The peak attracts many trekkers and devotees determined to scale the mountain. To reach the summit there are well-designated trekking routes. The most popular route is through the eastern mountain face taking off from the base village Bari.

Kalsubai Temple: The truncated summit provides a modest area of flat land which holds a sacred temple of a local deity.

The peak along with the adjoining hills spans along a downward-slanting east to the west axis eventually merging with the formidable escarpment of the Western Ghats at almost right angles. Along its length, they form a natural boundary demarcating the Igatpuri Taluka, Nashik district at its north from the Akole Taluka, Ahmednagar district at its south. The mountain itself lies on the Deccan Plateau, with its base at an elevation of 587 metres (1,926 ft) above mean sea level.

The krushnavanti river, a tributary of Pravara, takes origin on its eastern slope and flows like a stream through the outer fringes of Bari. A short distance away from the stream a Hanuman temple has been built. This provides an important landmark to commence the trek as well as a resting post for those nearing the final lap of their trek. The route from behind this temple takes the hiker straight to the summit. The trek along this route is a mix of easy to ascend slopes as well as treacherous rocky outcrops overlooking the valley below. Considering the increasing footfall in recent years, the government has built iron ladders along the vertical hill slopes.

HIGHLIGHT SHOTS

HIGHLIGHT OF THE TREK

1. Kalsubai Temple.
2. Highest Peak in Maharashtra.
3. Trek Difficulty Level Easy-Moderate.
